PROFILE

I am a passionate and dedicated web designer, web developer, front-end developer, wordpress designer and developer and SEO optimizer. I specialize in creating engaging, responsive, user-friendly and search engines favor (SEO) websites. I proficient in HTML, CSS, Javascript, modern framework Angular, frontend toolkit Bootstrap, PHP and Python. Adept at working in collaborative environments, with a proven track record of delivering high-quality, scalable, and responsive solutions.

EXPERIENCE

Auroville Consulting

2021 - At present

As a Front-end Web Developer

- Developed and maintained websites and applications using modern web technologies.
- Collaborated with designers to create seamless user experiences.
- Optimized website performance and ensured cross-browser compatibility.
- Developed RESTful APIs for seamless integration with front-end applications.

As a Back-end Web Developer

- Designed and implemented server-side logic using Python, ensuring optimal performance and scalability.
- Developed RESTful APIs using Flask and Django to support front-end functionality and facilitate seamless data exchange.
- Worked with SQL and NoSQL databases, including MySQL, and MongoDB, for data storage and retrieval.

As a WordPress Designer and Developer

- Designed and developed custom WordPress themes tailored to client specifications, ensuring a unique and responsive user experience.
- Integrated and customized various WordPress plugins to enhance site functionality

As a Chatbot Developer

- Created and integrated chatbots using Google Dialogflow to enhance user engagement and provide automated customer support on WordPress sites.
